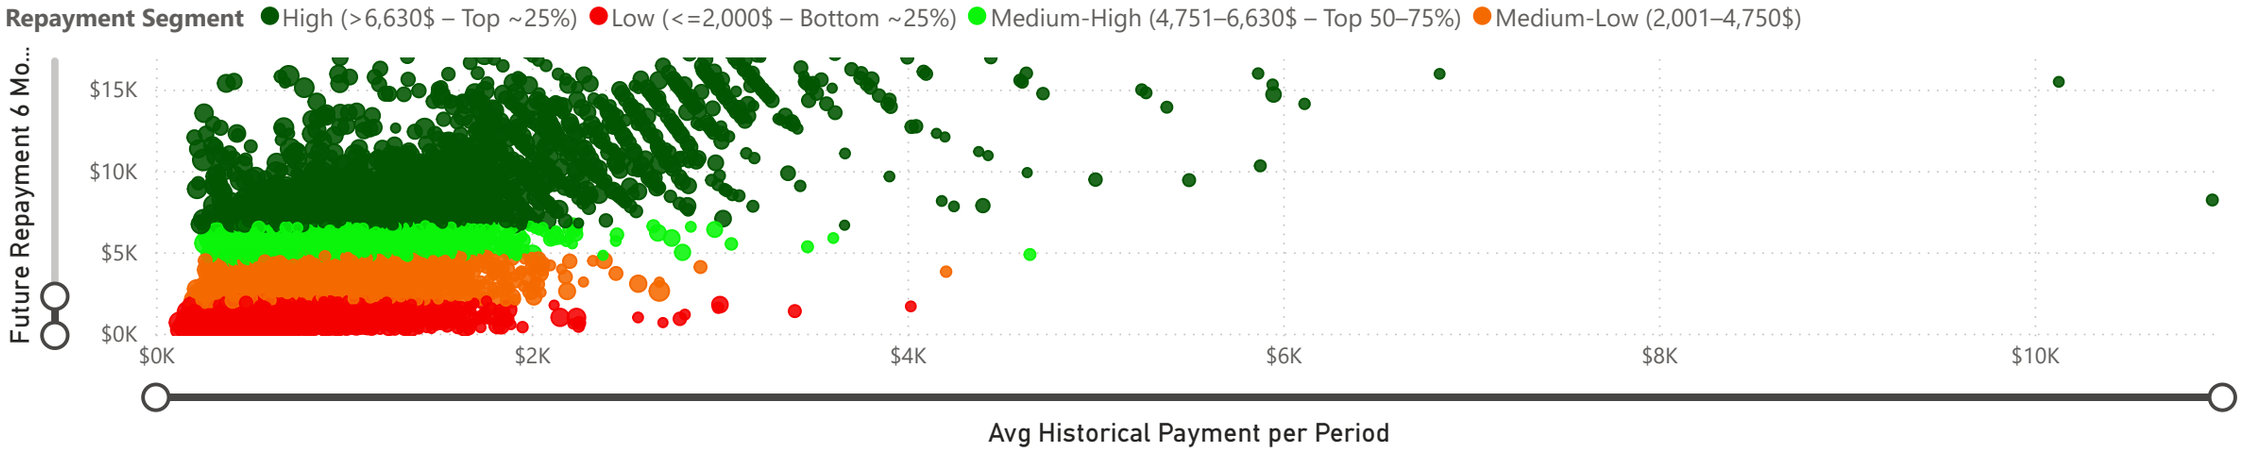
Sum of Historical Payment Periods and Sum of Total Historical Payments by Repayment Segment, Avg Historical Payment per Period and Future Repayment 6 Months



Quick measure

Key Insights & Recommendations

Strongest Predictor

0.68

Past Avg Payment Correlation to Future Payments.

High vs Low Repayment

~9.3x

High Segment repays ~9.3x more on average than low segment.

Contracts Analyzed

~28,000

Total PAYGo solar contracts in the dataset.

Recommended Threshold

>~$1,200

Avg Historical Payments per Period-Prioritize these customers!

Key Takeaways:

- Past average payment per period is the strongest predictor of future repayment strength **(correlation, 0.68).**
- High-performing segment repays **~9.3×** more on average than the low-performing segment.
- Almost no historical missed payments observed → risk driven by payment volume/affordability, not delinquency.
- Business recommendation: Screen / prioritize customers with average historical payment **>~$1,200** to improve cash flow and reduce risk.
